

PRODUCT CHAMP · DEPLOY. COMMAND. LEAD.

What You Need to Run AI Agents

A simple resource stack for business owners who want AI employees without the tech confusion.

Start simple. Stay in command. Let TAM manage the stack.

THE SIMPLE TRUTH

AI agents are not just prompts.

A real AI employee needs a complete operating stack around it. Most businesses fail because the system around the agent is missing.

Begin with the right AI subscriptions.

ChatGPT Plus

\$20/mo

Recommended first. Familiar, fast, and strong for everyday business usage.

- Quick tasks and planning
- Brainstorming and drafts
- Simple agent workflows
- Everyday assistant work

Claude Pro

\$20/mo

Recommended second. Excellent for writing, reasoning, long documents, and strategy.

- Long documents and summaries
- Higher-quality writing
- SOPs and agent instructions
- Content and strategic review

Your agent needs a channel where it can live.

Slack

Best for business teams, visibility, approvals, departments, project channels, and multi-agent workflows.

- Team visibility
- Approvals
- Project channels
- Agent notifications

Telegram

Fastest quick-start channel for mobile commands, owner/operator access, and pocket command messages.

- Quick commands
- Mobile access
- Owner/operator access
- Simple agent access

Best setup: Slack as command center · Telegram as pocket command channel

Your agent performs as well as the source material you give it.

Brand & Voice

Website, offers, FAQs, tone, examples, positioning, and do/don't say rules.

Sales & Content

Sales scripts, past emails, social posts, service descriptions, testimonials, and case studies.

Operations

SOPs, policies, onboarding docs, internal processes, and recurring decisions.

Without context, your agent guesses.

With a source library, it works like someone trained inside your company.

Connect your agent to real business tools.

Email + Calendar

Communicate — Gmail, Outlook, Calendar, booking links, and follow-up workflows.

CRM + Tasks

Organize — Product Champ, ClickUp, forms, lead records, tasks, and client notes.

Files + Sources

Learn — Drive, Dropbox, PDFs, websites, call transcripts, and source libraries.

Research

Find — ScrapeCreators, Composio, web research, social/channel data, and prospect sources.

Move faster without giving up control.

Agents can prepare

AI employees help you move faster without taking control away.

- Content drafts
- Call summaries
- Reports and task organization
- Webinar outlines
- Lead research
- Internal documents

Humans approve

Humans approve anything that affects clients, money, public content, or compliance.

- Emails and DMs
- Published posts
- CRM changes
- Spending money
- Legal, medical, or financial claims
- Customer promises

Once you have multiple agents, you need visibility.

Agent Status

See what each AI employee is doing, what is blocked, and what needs review.

Approval Queue

Review drafts, public content, client-facing assets, and external actions before they go live.

Source Library

Upload resources, track assets, manage links, and keep the business brain current.

Mission Control turns scattered chats into a visible operating system for your AI team.

Want TAM to manage the infrastructure?

Managed AI Agent Hosting

\$297/mo

For businesses that want TAM to host, monitor, and manage the agent infrastructure.

- Hosted AI agent workspace
- Slack / Telegram setup
- Basic connector configuration
- Monitoring and updates
- Monthly optimization

Custom HIPAA-Ready App Hosting

\$750–\$999/mo

For healthcare and sensitive-data workflows that need stronger controls and managed support.

- Custom app/agent environment
- Privacy-conscious workflow design
- Role-based access planning
- Custom integrations
- Higher support and monitoring

DEPLOY. COMMAND. LEAD.

Plan your AI Council.

Truly Authentic Marketing helps businesses deploy, command, and lead AI employees without getting lost in tools, model keys, integrations, hosting, and dashboards.

The owner stays in command.
The AI employees prepare the work. TAM manages the stack.
